

TD65B Tri-Deck Finishing Mower

Superior Quality - Superior Cut

The Progressive **TD65B** is a Tri-Deck rotary finishing mower providing a 15.5 foot cut. By using your 30-50 H.P. tractor the **TD65** can mow up to 90 acres in an eight hour day. The **TD65B** is operator friendly with straight forward and very low maintenance requirements.

Three independent floating decks are mounted on a robust transport frame. These decks conform to and follow most undulations and other ground conditions that are encountered during the mowing of parks, school yards, and other large recreation areas without scalping. Maintenance Free Blade Spindles offer peace of mind and lower cost of operation.

The superior cut is the result of our deck design. High lift rotary blades create enough vacuum to lift the grass for a smooth, even cut and then disperse the clippings evenly through the rear discharge system which is unique and an integral part of the deck design. The result is a superior after cut appearance.

Only minutes are required to change cutting heights from 1" to 5" without the use of tools. In addition, all operating functions for transport and mowing positions are activated from the tractor seat.

The **TD65B** is another example of the ingenuity and quality that goes into producing a durable, reliable, rotary finishing mower that is easy to maintain. The **TD65B** is not only of superior quality, providing a superior cut, it is "The Better Built Choice".

The Better Built Choice.™

Easy to transport and maintain:

Maintenance Free Blade Spindles are used to both lower cost and time of routine maintenance. They also provide peace of mind that a missed greasing won't render the mower out of service. Mechanical locks secure the decks in the transport position. Optional transport tires and fenders are available if the mower needs to be towed longer distances. All pivot points are fitted with easy to reach grease fittings making servicing fast and easy. A single piece 3/16" steel deck is formed and welded with bracing at high stress areas to provide for maximum structural strength.

A superior cut for a superior finish:

High lift rotary blades create enough vacuum to lift the grass for a clean even cut and then disperse the clippings evenly through the rear of each deck for a superior after cut appearance. An optional mulching kit is available to help return clipping nutrients to the soil.

Designed for the real world:

Progressive designed the TD65B mowing deck to provide even dispersion of clippings through the open rear discharge area - avoiding clumping and windrows. Only minutes are required to change the TD65B cutting height from 1" to 5" without the use of tools. For convenience and safety, all transport and mowing functions are activated without the operator leaving the tractor's seat.

TD65B Tri-Deck Finishing Mower Specifications

Part Number:	526515B	Cutting Height:	1" to 5" in 3/8" steps
Cutting width:	15.5 feet	Weight:	2720 lbs
Recommended PTO HP:	30-50	Transport Width:	8.5 feet
Mowing Capacity:	2 mph 3.7 acres / hour	Transport Height:	7.5 feet
	4 mph 7.5 acres / hour	Transport Length:	14 feet
	6 mph 11.3 acres / hour		
Turning Radius:	0" uncut circle (zero turning radius)		
Transport Tires:	Two 18 X 9.50 X 8 NHS, 6 ply, Turf Saver Tires
